

I got taught finger knitting by Levi. I had no clue what to do; now I know what to do. I had fun finger knitting. I also like to do stamp game. I love math. I like to do it with somebody, kind of like I did Monday and Tuesday. There are these cards in our classroom. They are math cards that are adding and subtracting. When I got taught it, I had so much fun. I like computer lab too. We work out our fingers and we work on computers with typing; and it is fun. We have these books in our classroom that are called *Bone* and they are so amazing to read. There are nine books. I've read one so far. I'm excited to keep reading and learning this year.
