

March 6, 2020

Hello Wonderful Parents and Guardians!

Our next home projects are due the week of March 23. Originally they were due the week of the 16th. However, since I failed to get this letter out sooner, I have pushed them back a week.

Please help your child with this project and allow them to do as much of the work as possible. Having your child use a few note cards with their own handwriting and their own sentences or key words is a good way to remember their key info. Our goal is for your children to be able to stand in front of a group and re tell the information they learned through their research without reading directly from a typed text or excerpt.

Please take a few minutes at dinner or bedtime to have your child retell to you or their siblings five key points that they think they would like to present to the class when the time comes.

Description of the project:

Subject-*Zoology* Title-*Class of Invertebrate*

Students will need to research the category of invertebrate animals that they have been assigned. The following are things they will be expected to cover in their presentation:

How it looks-- its physical characteristics

Where it lives

How it moves

How and what it eats

Other interesting facts

The class of invertebrate your child has been assigned is _____.

The day your child will be presenting to our class is _____.

Please have their home project done and at the school by this day.

Thank you for your support in this. We are excited to see and hear the wonderful work your children do.

Ms. Jalee & Ms. Tiffany
