

Name:

Anole Study Guide

Overview: For our jr. high school pet we are housing anole lizards. Where are they from? How do we take good care of them? Read on my friends for the knowledge to unlock these mysteries.

Guiding question: Can you demonstrate your understanding of anole habitat and care?

Checklist:

___ Research and answer the following questions.

1. What is the diet of the green anole in captivity?
2. What temperature and humidity do anoles need?
3. How often and how should you clean the habitat?
4. What type of habitat do anoles need do they need a desert habitat with few plants or do they like a humid climate with lots of vegetation?
5. Do anoles enjoy being handled or do they prefer to be left alone?
6. Where does the green anole originate from?

___ Research and answer 3 or more of the following questions.

1. What is the average size for an adult anole?
2. How long do anoles live in captivity?
3. What predators does the anole have in the wild?
4. Are anoles nocturnal?
5. What unique traits does the anole have?

When you feel that you can demonstrate your understanding of this incredible reptile submit this study guide with your name and you will receive certification for zoologist.
