

Geography Essay #3

Due December 16th

Theme: Geography and Society

At various times in global history, human activity has altered or changed the land people live on and their surrounding environment. These changes in physical geography have affected society.

Task: Select **two** changes that a society or **two** different societies have made to their land or surrounding environment, and for each change:

- Identify the society in which the change took place
- Describe how the physical environment was changed by human activity
- Discuss how the change in the physical environment affected society

You may use any two examples from your study of global history and geography. Some suggestions you might wish to consider include irrigation systems, terrace farming, road systems, canal systems, burning of fossil fuels, or the use of nuclear power. You are not limited to these suggestions.

Do not use any environmental change that occurred in the United States in your answer.

Requirements:

- 5-paragraph essay

- Typed:

Double spaced

12 pt. font

Times New Roman

- At least 3 sources
