Study Guide Structures Cycle

Math 7/8 Week 6 & 7: January 4th – January 6th & January 9th – January 13th

Essential Questions:

- What applications do algebraic expressions have to real life?
- How are linear equations useful in problem solving?

Overview: This next week and a half, we are revisiting the material that has been covered so far and giving the opportunity to the students to reassess previous topics and for the 8th graders to show proficiency with the topics they have learned so far. After these two week, we will be splitting the grades into classes that match their grade level and moving forward with the respected material.
